MOMENTUM

Get the most from your network devices with Momentum

Fully managed, fully connected

Need help managing your network devices? Momentum's got you covered. With our Network-as-a-Service (NaaS) LAN solution, all you'll need to worry about is getting online. We'll take care of the rest.

Through the Juniper Mist platform, we'll set your business up with a reliable, resilient self-healing network backed by powerful network analytics and proactive, intelligent automation. We can also Mist to help you augment your IT staff with AI-driven network analytics monitoring.

Tailored to your specific networking needs

Our NaaS - LAN product delivers incredible value beyond Juniper Mist's capabilities. Leveraging our expert engineering resources, we can provide fully tailored WAN, Internet, Wired, Wireless, and voice — all from a single vendor.

Trusted by over 30,000 locations around the world, we've been delivering diverse network solutions to enterprise clients for over two decades. We understand the network challenges your business faces.

And we know exactly how to help you overcome them.

HIGHLIGHTS

High-touch 24/7 support and expert engineering

Over 200 global points of presence on a geo-redundant carrier network

Monitor traffic metrics by SSID, switch interfaces, or WAN zones

Access comprehensive reports on traffic, apps, and clients

Consolidate multiple solutions, locations, and vendors into one invoice and dashboard

Use WAN visibility for link and application QoS

Managed network services from WAN to Wireless

Available for Juniper SSRs, SRXs, Switches, and Access Points, Momentum NaaS supports both highly-available, segmented wired networks and secure, self-healing wireless coverage for difficult environments.

Maximize value while getting online through our global footprint

With over 200 points of presence across the globe and the ability to deploy our own circuits, Momentum will get your business the best possible value no matter where in the world you operate.

Enjoy simple, painless cloud connectivity

Momentum provides one of the best ways to connect your office locations to the public cloud, with direct connections to Azure ExpressRoute, AWS Direct Connect, and Google Cloud Interconnect. We can also connect you to collocated or on-prem VMWare Private clouds through Momentum SDWAN.

Ensure reliability through redundancy

Because we can source circuits from a wide range of last-mile providers, we can easily meet your Internet diversity and redundancy goals. We also offer fully redundant site-to-site connectivity.

Count on comprehensive, reliable built-in security

Momentum offers comprehensive wired and wireless security for all network services, including a web filter, intrusion detection, and an advanced firewall that will help you not only meet your compliance goals but also make the best possible use of your bandwidth.
