

TEAMS FAXING

Flexible, full-fledged faxing in Microsoft Teams — no extra software or hardware required

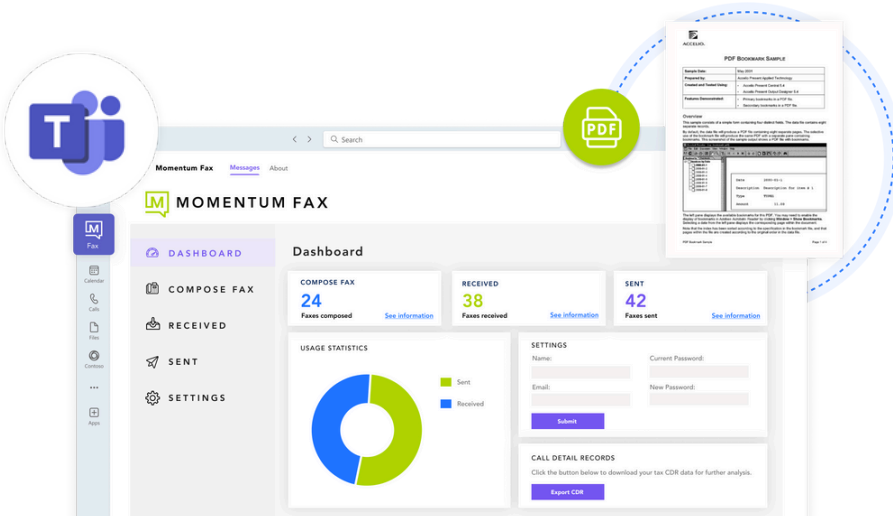

Send and receive faxes in Teams

Enable secure, seamless cloud faxing with Momentum and Microsoft Teams.

Maintain complete control and visibility over essential documents while empowering your staff to send and receive faxes from anywhere and at any time. Reduce overhead by using less paper and ink and eliminating fax machine service calls while quickly sending and receiving faxes.

With Momentum, sending a fax is as easy as sending an email.

HIGHLIGHTS

Global faxing supported by a geo-redundant network with 200+ points of presence

Fax to users or shared groups

Support faxing to and from legacy devices within Teams

Get dedicated help with 24/7 high-touch support

Maintain compliance with HIPAA and other data and privacy regulations

Digital faxing built for modern businesses

Keep your business's communication lines free, enhance productivity and improve efficiency by enabling faxing directly within Microsoft Teams. Avoid lineups and errors while providing employees with an intuitive, familiar, and secure interface.

Carrier-grade connectivity

Connect directly with Microsoft's infrastructure via our redundant, sophisticated network, and take advantage of more than 200 global points of presence and relationships with more than 750 carriers.

Unmatched flexibility

Use either existing or toll-free numbers and fax manually or schedule in advance. Augment Teams Faxing with a range of additional services, including Teams Phone, SIP trunking, SD-WAN, and Texting for Teams.

Compliant security

Our Teams Faxing solution is fully HIPAA-compliant, adhering to the highest industry standards, and capable of both outbound and inbound faxing from legacy devices.
